CUDMORE, SEDLEY ANTHONY (Assistant Professor, Political Economy) December 1918 (031)

December 13th, 1918

Professor Cudmore,

University of Toronto.

Dear Professor Cudmore:

I have looked through your memorandum on the Co-ordination of educational statistics and have been astonished at the immense amount of work that you have put upon it. I should hardly be in a position to give a reasoned judgment without reading it more carefully than I have yet had time to do or am likely to have for a good while, though your suggestions appear to me to be very sensible and I hope that there will be some good result from such a long piece of work.

Yours sincerely,

President.
